

London 1 Data Center

Home to the cloud: e-marketplace for growth and innovation

The London 1 Data Center will offer highly available, scalable data center space with high power density, carrier neutrality, flexible colocation spaces, cloud network access, connectivity and on-site support as well as on-site service personnel.

The first phase of London 1 Data Center is currently planned to open in Q2 2020. Customers can choose from flexible colocation deployments of single rack colocation and suites through to turnkey build to suit or shell & core solutions.

A solution for every requirement

e-shelter offers you complete solutions for housing your IT and network systems in a secure, high-availability environment. Whether for a short-term project, for the implementation of a private or hybrid cloud or for a project, which you only want to implement in the next couple of years, we can provide you with the best possible environment. As the requirements on IT are changing constantly due to technical development and the new possibilities of cloud computing, our space and performance parameters of our technical infrastructure offer you the highest possible flexibility.

High availability in secure space

Your requirements are the most important aspect of our service offering. We offer space that ranges from commercial property to completely configured, high availability data center space as well as all the services for planning, design, operation and security. You choose, we deliver. Whether you choose a building shell which you configure yourself, or which we configure according to your brief, or you decide on a fully configured suite with pre-installed racks: we will ensure the space is available to you on schedule and at consistently high standard of quality.

Overview of main e-shelter's product offerings:

Fully fitted:	e-power-rack e-carrier-rack	Separate space, server and network cabinet including infrastructure
	e-cage™	Separate lockable space from 20 sqm
	e-suite	Separate locked room with a size from 300 sqm
Shell and core:	e-area™	Provision of constructed shell and core space from 1,000 sqm
Land:	e-site	Provision of land with upstream grid connection and planning

Infrastructure:

High availability and security

Data center space

- 25,600 sqm of IT space
- Flexible colocation deployments: single rack colocation, suites, turnkey build to suit and shell & core solutions

Power

- Gross power connection of 80 MVA
- Average power density of 2.5 kW/sqm
- N + 1 UPS redundancy
- n+1 generator backup

Connectivity

- Carrier neutrality
- Multi cloud interconnect gateway
- e-connect pre-cablings and ports
- Cross-, Internet- and DC connects
- Private- and Cloud connects

NTT network

- As a member of NTT Communications Group of companies, e-shelter provides access to a global network of more than 140 data centers
- Connectivity options to the global NTT fibre network carrier-routes

Security

- e-shelter is industry-leading in terms of security and compliance
- 24/7 security and service control centers

Services

- Installation services
- Facility management and tenant fit out
- 24/7 remote hands

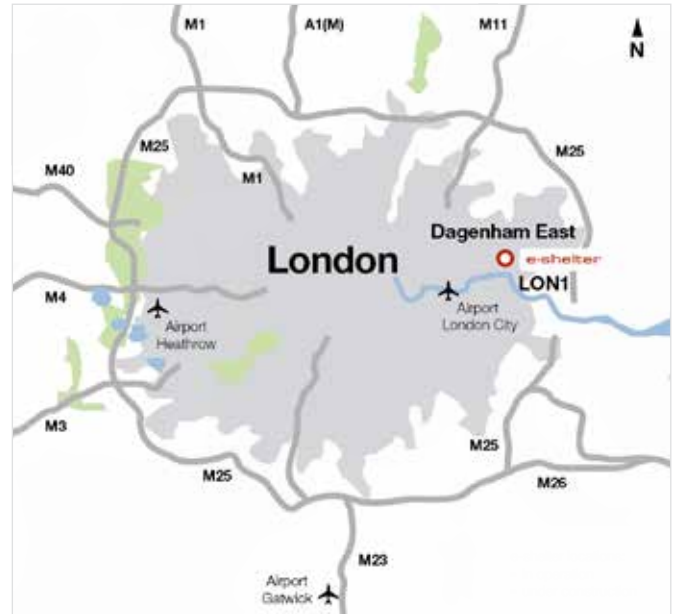

About e-shelter

e-shelter was founded in 2000 and quickly established itself as a leading provider of data centers in Germany. Over the past 18 years, e-shelter has grown into an international organization, employing nearly 400 people with diverse backgrounds and specializations that continually contribute to the company's success. We operate ten data center locations within Germany, Austria, and Switzerland and are currently expanding to Amsterdam, Madrid, and London.

As a member of the NTT Communications Group of companies, e-shelter provides access to a global network of 140 data centers. Among e-shelter's clients are financial services companies, telecoms operators, public sector, IT service, as well as outsourcing and cloud service providers.

In addition to e-shelter, companies such as Arkadin, Dimension Data, itelligence, NTT Communications, NTT DATA and NTT Security are part of the NTT Group in Germany. In this region, the NTT Group represents around 5,300 employees and combined revenue of more than € 1.2 billion.
