### **Telecom Luxembourg opens POP at three e-shelter data centers**

Page 1/1

Telecom Luxembourg, the first private, global internet service provider of the Grand Duchy of Luxembourg, is establishing a point-of-presence at three e-shelter sites.

Frankfurt am Main,  
April, 20th 2015

At the data centers of Frankfurt Campus, Vienna and Zürich, Telecom Luxembourg will provide points-of-presence for online services, thus consequently expanding its presence on the German-speaking market. "Relevant for our decision was the excellent geographic presence and the TIER III + data centers in DACH region and the outperforming quality of the data centers"; commented Vincent Nicolay, CEO of Telecom Luxembourg, his decision," says Vincent Nicolay, CEO of Telecom Luxembourg, commenting about the decision.

Our carriers rely on tried-and-tested and futureproof data center infrastructure," says Melanie Rittweger, Chief Marketing Officer of e-shelter, about the new service. "With our connection between customer, cloud provider and carrier, an eco-system is developed, offering the highest degree of connectivity to all parties concerned within the shortest space of time," continues Melanie Rittweger.

The individual e-shelter data centers all have at least two Carrier-Meet-Me-Rooms, guaranteeing redundancy at all times. Thanks to structured precabbling, e-shelter customers and carriers can connect with each other within 24 hours.

A redundant cabling to the e-shelter Campus and other e-shelter and alternative data centers will ensure even more security. Through the partners of IX Reach and DE-CIX, there is direct connection to the international internet exchanges in London, Amsterdam and New York, which in turn connect with more than 20 other exchanges and provide access to all leading cloud providers.

### **About Telecom Luxembourg**

Telecom Luxembourg Private operator SA is a private Luxembourgish operator. The company proposes a large range of services including access to datacenters, high-speed connectivity networks operating on a fiber-optic infrastructure, as well as numerous other managed services oriented towards professional customers and international telecom operators. Telecom Luxembourg has 150 PoPs, 4 datacenters, and 400+ local and global customers.

### **About e-shelter**

e-shelter designs, builds and operates high-availability data centers, whose infrastructure guarantees the highest standards of physical security and operational reliability. e-shelter operates approximately 90,000 sqm of data center space, on seven sites. 60,000 sqm space alone are located at e-shelter's main site in Frankfurt, Germany, making it Europe's largest single data center site. Additional sites are located in Berlin, Frankfurt, Hamburg, Munich and Zurich, from June 2015 in Vienna. Among e-shelter's clients are financial services companies, telecoms operators and IT service providers as well as cloud service providers.
